

## 以 VNC 登入後無法管理主機

說明：以 VNC 登入後，出現如下畫面

步驟一：執行 putty 程式

步驟二：輸入登入帳號與密碼，登入成功後，輸入 `service vncserver restart`，再按下 Enter 鍵，重啟 VNC 服務即可

```
root@localhost:~  
login as: [redacted] 's password: [redacted]  
Last login: [redacted]  
[redacted@localhost ~]# service vncserver restart  
正在關閉 VNC 伺服器 : 1: [redacted] [ 確定 ]  
正在啟動 VNC 伺服器 : 1: [redacted]  
New ' [redacted] ':1 ( [redacted] ) ' desktop is [redacted] :1  
Starting applications specified in [redacted]  
Log file is [redacted] :1.log  
[redacted@localhost ~]# [redacted] [ 確定 ]  
[root@localhost ~]#
```

The screenshot shows a terminal window with the following steps and annotations:

- `login as:` followed by a red box labeled "輸入管理者帳號" (Enter administrator username).
- `'s password:` followed by a red box labeled "輸入管理者密碼" (Enter administrator password).
- `[redacted@localhost ~]# service vncserver restart` followed by a red box labeled "輸入重啟 vnc 指令，按下Enter鍵" (Enter restart vnc command, press Enter key).
- Output: "正在關閉 VNC 伺服器 : 1: [redacted] [ 確定 ]"
- Output: "正在啟動 VNC 伺服器 : 1: [redacted]"
- Output: "New ' [redacted] ':1 ( [redacted] ) ' desktop is [redacted] :1"
- Output: "Starting applications specified in [redacted]"
- Output: "Log file is [redacted] :1.log"
- Output: "[redacted@localhost ~]# [redacted] [ 確定 ]"
- Final prompt: "[root@localhost ~]#" with a red box labeled "vnc服務重啟完成" (VNC service restart complete).
